Join the OptiNav (Carl Zeiss Group) team!

optinav

OptiNav is a great place to work for people who appreciate the flexible working hours and a good atmosphere. The company is still developing, and needs more talents and new ideas. We specialize in optical navigation and machine vision for the industrial and medical applications. Our mission is the sustainable growth by realization of development research and customized solutions. We are a research partner of Carl Zeiss Group and alliance partner of National Instruments company. Be part of it!

We are looking for:

Software R&D Engineer (C#)

Place of work:
Gdynia, PPNT, Poland

Join our software engineering team and have fun discovering the technology limits. Learn the C# language world and combine it with the newest medical and industrial R&D projects. Big Data, Machine Vision or maybe System Integration: bring your crazy ideas and dive into the technical world in order to make our customers happy.

Apply if you have a self-driven desire to learn and master current and new technologies in the field of vision systems.

We also invite students to apply.

Your job to take:

- C# programming
- developing applications
- testing applications
- planning software tests
- documenting work in English
- cooperation with medical research and industry

Your skills to extend:

- good knowledge of high level C# programming language
- experience in execution and testing of written software
- good spoken and written English
- openness of mind, creativity and teamwork
- analytic mind and the skill to organize work
- degree in software, electronics, computer science or electrical engineering

We offer you:

- diversity of tasks and modern equipment
- good money and flexible working hours
- friendly work environment
- an individual development plan

Additional benefits...

- Free technical training
- beautiful Baltic Sea and summer party feeling
- international projects
- group insurance

Apply, If you want to add innovation to the software engineering world... **career@optinav.pl**
